## 2009 H1N1 Lakota Schools Guideline

- WCSC has adopted the same guideline as the Lakota School System
- With the recent confirmed cases of H1N1 in the Lakota School district - please review the following information from Lakota Schools and apply to athletic participation.
- Click or copy to your browser to review:  
<http://www.lakotaonline.com/departments.cfm?subpage=1825>

While we don't want to over react -- necessary precautions are prudent in this area.

- Players should not drink or eat from the same cup, bottle, plate, utensils etc.
- When possible, hand sanitizer is recommended before "good game" hand shake/high 5 at the end of each match. Kids should bring their own hand sanitizer to avoid any allergic reactions to the ingredients / fragrances found in some brands.
- If kids are not feeling well -- they should not come to practice or games.
- SAYNorth has adopted the policy around H1N1 that if the schools close local soccer clubs (WCSC, LSO) should postpone games until the Lakota schools re-open.
- WCSC always has hand sanitizer available at the concession stand area.
- If you have any questions, please let us know.
